

Meera Krishnan

Department of Computer Science • University of Kerala
meera.k@email.com • +91 95620 98765 • Research Gateway ID: mk-cs-2026

RESEARCH INTERESTS

Artificial Intelligence Fundamentals, Knowledge Representation, Distributed Intelligent Systems, Multi-Agent Systems Optimization, Cloud Virtualization Mechanics, and Foundational Multi-threaded Matrix Computing Models.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2025

University College, Trivandrum

First Class with Distinction (Aggregate 91.5%). Thesis: Automated Verification of AI Knowledge Fields using Classical Turing Testing Variations.

ACADEMIC & RESEARCH PROJECTS

Formal Evaluation of Multi-Threaded Matrix Multiplication Systems

Winter 2025

Analyzed processing thresholds for overlapping row-column calculations. Optimized runtime vectors where processing constraints are represented by linear bounds $T \leq \alpha \times (N^3 / P)$, where N represents matrix dimensionality and P denotes processing core clusters.

Architectural Core Analysis of Next-Generation Internet of Things (IoT)

Autumn 2025

Synthesized complex multi-layered node structures into explicit architectural frameworks. Formulated clear management patterns handling data leakage controls directly at peripheral edge gateways.

TECHNICAL PROFICIENCIES

Theoretical Knowledge: Knowledge Engineering Frameworks, Turing Testing Models, Cloud Virtualization Architecture (S5 Elective Core).

Languages & Environments: Advanced C Programming, Python Data Frameworks, Unix/Linux (FOSS environment administration).

ACADEMIC ACHIEVEMENTS & LEADERSHIP

- Ranked top 1% across collegiate Computer Science cohorts in advanced laboratory evaluations.
- Student Convener for the National Seminar on Open Source Software (FOSS Ecosystems, 2025).
